Profile:

Software Engineer with Python and Rust expertise, and experience in developing robust applications on Azure using Kubernetes. Skilled in communication and presentation, and passionate about climate tech solutions.

Software Experience:

- Software Engineer, Microsoft (Sep 2022-Present)
 - Developed a Rust based solution to configuration translation with an extensive testing framework.
 - Deployed a voicemail solution on Azure for a large telco using Kubernetes clusters.
 - Wrote and owned an automation bot to manage and fix CVEs using Python.
 - Scrum master for a team of 10, achieving more efficient impact driven meetings.
 - Worked with Java and JavaScript to maintain a workplace messaging app.
 - Gave demos to 100+ people on the uses and capabilities of GitHub Copilot.
 - Running a sustainability series, personally giving talks on fishing and carbon removal companies.
- Built a personal website using React - <https://www.jamesjhirst.com/>.
- Volunteer Machine Learning Engineer, [Shark Trust](#) (2023-Present) classifying shark and ray eggs by species to substitute for manual classification.
- Machine Learning Engineer, Cambridge (2022), worked on a machine learning ecology project using Detectron2 to predict the location of tree crowns to improve estimates of carbon store in forests and other locations. Resulted in a scientific paper published in a variety of journals.
- Software Engineer, Microsoft, 8-week virtual internship (2021), wrote Python to improve the automation of VM deployment and management for products in the telecoms sector.

Qualifications:

- MMath, Mathematics Master's Degree, University of Cambridge, Jesus College (2021-22)
 - Pass with Distinction (79%)
 - Modules: General Relativity, Black Holes, Quantum Field Theory, Cosmology, String Theory
- BA, Mathematics Degree, University of Cambridge, Jesus College (2018-2021)
 - 1st Class in third year (position: 14/222, percentage: 86%)
 - Jesus College Mathematics Award in second year (2019-20) for top performer
 - 1st Class in first year (position: 61/232, percentage: 72%)
- A-Level: 5x A*- Maths, Further Maths, Additional Further Maths, Physics, Chemistry
- IGCSE/ GCSE: 14x A*'s and an A

Other Experience

- Restaurant manager, Hotelplan, winter ski season (2017-18), managed 20 staff of varying ages. Achieved 'Mountain Spirit Award' out of 500 employees for performance.
- Private tutor and Explore Learning Colchester Tutor (2017) in Maths.
- Team Leader for [BL4S](#) (2016), led the winning team for an international competition held by CERN. We proposed an experiment to investigate Einstein's Special Theory of Relativity and then completed the data collection using a particle accelerator at CERN and published a scientific paper in IOP Journal.

Personal Qualifications:

Vice School Captain
BPO Round 1- Gold Award (Top 50 Nationally)
PADI Open Water Certified

Cambridge University Ski Freestyle Captain
Wado-Ryu Karate- 2nd Dan Black belt
National Citizenship Service Award
