Software Engineer:

Software Engineer with Python and Rust expertise, and experience in developing robust applications on the cloud using Kubernetes. Proficient in Machine Learning technology and capable of owning and creating systems. Skilled in communication and presentation, and passionate about technical problems.

Skills:

- Python
- Rust
- React
- TypeScript
- GitHub Copilot
- Azure
- Kubernetes
- Terraform
- TensorFlow
- HTML/CSS

Experience:

- Software Engineer, Microsoft (Sep 2022-Present)
 - Developed a Rust based solution to configuration translation with an extensive testing framework.
 - Deployed a voicemail solution on Azure for a large telco using Kubernetes clusters.
 - Wrote and owned an automation bot to manage and fix CVEs using Python.
 - Scrum master for a team of 10, achieving more efficient impact driven meetings.
 - Worked with Java and TypeScript to maintain a workplace messaging app.
 - Gave demos to 100+ people on the uses and capabilities of GitHub Copilot.
 - Running a sustainability series, personally giving talks on fishing and carbon removal companies.
- Built a personal website using React - <https://www.jamesjirst.com/>.
- Volunteer Machine Learning Engineer, [Shark Trust](#) (2023-Present) classifying shark and ray eggs by species using TensorFlow.
- Machine Learning Engineer, Cambridge (2022), worked on a machine learning ecology project using Detectron2 to predict the location of tree crowns to improve estimates of carbon store in forests and other locations. Resulted in a scientific paper published in a variety of journals.
- Software Engineer, Microsoft, 8-week virtual internship (2021), wrote Python to improve the automation of VM deployment and management for products in the telecoms sector.

Qualifications:

- MMath, Mathematics Master's Degree, University of Cambridge, Jesus College (2021-22)
 - Pass with Distinction (79%)
- BA, Mathematics Degree, University of Cambridge, Jesus College (2018-2021)
 - 1st Class in third year (position: 14/222, percentage: 86%)
 - Jesus College Mathematics Award in second year (2019-20) for top performer
- A-Level: 5x A*- Maths, Further Maths, Additional Further Maths, Physics, Chemistry
- IGCSE/ GCSE: 14x A*'s and an A

Other Experience

- Restaurant manager, Hotelplan, winter ski season (2017-18), managed 20 staff of varying ages. Achieved 'Mountain Spirit Award' out of 500 employees for performance.
- Private tutor and Explore Learning Colchester Tutor (2017) in Maths.
- Team Leader for [BL4S](#) (2016), led the winning team for an international competition held by CERN. We proposed an experiment to investigate Einstein's Special Theory of Relativity and then completed the data collection using a particle accelerator at CERN and published a scientific paper in IOP Journal.

Personal Qualifications:

Vice School Captain
BPO Round 1- Gold Award (Top 50 Nationally)
PADI Open Water Certified

Cambridge University Ski Freestyle Captain
Wado-Ryu Karate- 2nd Dan Black belt
National Citizenship Service Award
